

# Aquatic Analysts Services and Price List

*Effective January 1, 2026*

## Freshwater algae analyses

Phytoplankton:       \$ 180/sample

Periphyton:         \$ 225/sample

Toxic Algae Only:   \$ 95/sample

Additional charges: (per sample)

Fast service (14 days) . . . . . \$ 50

Standard analyses include identification to species level (for most algae), enumeration, and biovolume estimates of all algae encountered within a minimum of 100 natural units. It also includes cells/mL of all toxic algae species in the sample. Data reports are available upon request at no extra charge (Summary and Database files).

“Toxic Algae Only” analyses include natural units/mL and cells/mL of all toxic algae in the sample.

Standard turn-around time is one to four months (varies with number of samples received). Fast turnaround time is 14 days guaranteed; but note we give our fast-service algae samples top priority, and we usually complete them within 2-3 days.

We will be glad to provide you with sample bottles at no extra cost.
